

2007 NATIONAL ELECTRIC SAFETY CODE JANUARY 9 - 10, 2008

- Date: Wednesday & Thursday, January 9 - 10, 2008
- Time: 9:00 a.m. - 4:30 p.m.
- Registration Deadline: February 1, 2008
- Fee: \$350 for 10 - 15 students
\$250 for 16 - 20 students
\$190 for 21 - 25 students
\$155 for 26 or more students
- Participants are required to bring their own NESC book to class. Books will not be provided.
- Participants will be billed following the completion of the course.
- The registration fee for this course has been reduced thanks to a grant from the Colorado Electric Educational Institute.
- Location: Tri-State G&T headquarters
1100 West 116th Ave., Westminster, Colorado
- Cancellation Policy: Cancellations received on or before the registration deadline will not be charged. Cancellations received after the deadline may be billed 25 percent of the registration fee.
- Confirmation: A minimum of ten people must be registered for the course to be held. A letter will be faxed to all participants confirming their registration in the course.
- To Register: Contact Liz Fiddes at the CREA office (303) 455-2700 ext. 103, or e-mail at liz@coloradorea.org
- Audience: This course is designed for operation managers, engineers, stakers, and lineworkers
- Instructor: Bob Witter
- Note: **Students must bring their own NESC book to class**

2007 NATIONAL ELECTRICAL SAFETY CODE

The National Electrical Safety Code (NESC) is the consensus standard for electrical safety in the design, construction, operation and maintenance of electric facilities for most electric utilities and cooperatives in the United States. The NESC is generally adopted by statute by most state utility commissions and many times it becomes the standard of care by which utility construction and operations are judged during litigation against utilities.

This seminar is designed to explore the history and development of the NESC, the process by which the NESC is codified and amended, and how the NESC is applied to overhead and underground lines and equipment, substations and utility employer/employee work rules. The seminar covers all rules pertaining to electric utility construction and operation, including the most current rule changes found in the 2007 NESC.
